TOMUS XLIV — 1982 — 44. KÖTET

Ahmad, Khalil—Jain, P. K.—Maskey, S. M., A note on boundedly complete decomposition of a Banach space ..... 365—369
Baldwin, J. T.—Berman, J., Definable principal congruence relations: Kith and kin ..... 255—270
Berman, J., *cf.* Baldwin, J. T. ..... 255—270
Bogdanović, S., Bands of power joined semigroups ..... 3—4
Bouldin, R., Compact approximants ..... 5—11
Chajda, I., Tolerance Hamiltonian varieties of algebras ..... 13—16
Chapman, K. B.—Pigno, L., The range of the transform of certain parts of a measure ..... 17—21
Csörgő, S.—Horváth, L., On random censorship from the right ..... 23—34
Czédli, G., Factor lattices by tolarences ..... 35—42
Demlová, M.—Goralčík, P.—Koubek, V., Inner injective transextensions of semigroups ... 215—237
Farkas, M., Attractors of systems close to autonomous ones ..... 329—334
Fernandez, D. L., On the duality of interpolation spaces of several Banach spaces ..... 43—51
Goralčík, P., *cf.* Demlová, M.—Koubek, V. ..... 215—237
Gould, M., Rectangular bands in universal algebra: Two applications ..... 271—279
Grätzer, G.—Huhn, A. P., Amalgamated free product of lattices. I. The common refinement property ..... 53—66
Horváth, L., *cf.* Csörgő, S. ..... 23—34
Huhn, A. P., *cf.* Grätzer, G. ..... 53—66
Jain, P. K., *cf.* Ahmad, Khalil—Maskey, S. M. ..... 365—369
Joó, I., Upper estimates for the eigenfunctions of the Schrödinger operator ..... 87—93
Kátai, I., Additive functions with regularity properties ..... 299—305
Kérchy, L., Injection-similar isometries ..... 157—163
Knoebel, A., The finite interpolation property for small sets of classical polynomials ..... 287—297
Komornik, V., Lower estimates for the eigenfunctions of the Schrödinger operator ..... 95—98
Koubek, V., *cf.* Demlová, M.—Goralčík, P. ..... 215—237
Kuo, Chi-Chin Tung—Thompson, R. C., Doubly stochastic, unitary, unimodular, and complex orthogonal power embeddings ..... 345—357
Langer, H.—Textorius, B., Generalized resolvents of contractions ..... 125—131
Lebow, A.—Schreiber, M., Polynomials over groups and a theorem of Fejér and Riesz .... 335—344
Maskey, S. M., *cf.* Ahmad, Khalil—Jain, P. K. ..... 365—369
Móricz, F., A general moment inequality for the maximum of partial sums of single series 67—75
Móricz, F., On the a.e. convergence of multiple orthogonal series. I. (Square and spherical partial sums) ..... 77—86
Pastijn, F.—Romanowska, A., Idempotent distributive semirings. I ..... 239—253
Pigno, L., *cf.* Chapman, K. B. ..... 17—21
Puczyłowski, E. R., A note on hereditary radicals ..... 133—135
Rhoades, B. E.—Sharma, N. K., Spectral results for some Hausdorff matrices ..... 359—364
Romanowska, A., *cf.* Pastijn, F. ..... 239—253
Schreiber, M., *cf.* Lebow, A. ..... 335—344
Sebestyén, Z., Moment theorems for operators on Hilbert space ..... 165—171
Sharma, N. K., *cf.* Rhoades, B. E. ..... 359—364
Stachó, L. L., A projection principle concerning biholomorphic automorphisms ..... 99—124
Stern, M., On derivations in generalized matroid lattices ..... 281—286
Székelyhidi, L., The stability of d'Alembert-type functional equations ..... 313—320
Szendrei, M. B., Strong subband-parcelling extensions of orthodox semigroups ..... 185—213

Tandori, K., Beitrag zu den Arbeiten „Bemerkung zu einem Satz von S. Kaczmarz" und „Über einen Satz von Alexits und Sharma" ..... 307—311
Textorius, B., *cf.* Langer, H. ..... 125—131
Thompson, R. C., *cf.* Kuo, Chi-Chin Tung ..... 345—357
Turo, J., Existence and uniqueness of random solutions of nonlinear stochastic functional integral equations ..... 321—328
Wu, P. Y., Approximate decompositions of certain contractions ..... 137—149
Wu, P. Y., When is a contraction quasi-similar to an isometry? ..... 151—155

Bibliographie

R. E. EDWARDS, Fourier Series. A Modern Introduction, Vol. 1. — Euclidean Harmonic Analysis, Proceedings of Seminars Held at the University of Maryland, 1979. — T. W. GAMELIN, Uniform Algebras and Jensen Measures. — HERMAN H. GOLDSTINE, A History of the Calculus of Variations from the 17th through the 19th Century. — G. Iooss and D. D. JOSEPH, Elementary stability and bifurcation theory. — J. E. MARSDEN and M. MCCRACKEN, The Hopf bifurcation and its applications. — R. O. WELLS, Differential Analysis on Complex Manifolds. — H. WERNER und R. SCHABACK, Praktische Mathematik II. — A. WERON, Probability on Vector Spaces II. — GEORGE W. WHITEHEAD, Elements of Homotopy Theory. — ..... 173—179

Analytical Methods in Probability Theory.— S. BURRIS—H. P. SANKAPPANAVAR, A Course in Universal Algebra. — W. K. BÜHLER, Gauss. — J. T. CANNON—S. DOSTROVSKY, The evolution of dynamics: Vibration theory from 1687 to 1742. — J. CARR, Applications of centre manifold theory. — The Chern Symposium 1979. — M. CSÖRGŐ—P. RÉVÉSZ, Strong Approximations in Probability and Statistics. — L. R. FOULDS, Optimization Techniques. — From A to Z. — Geometry and Differential Geometry. — B. D. HASSARD—N. D. KAZARINOFF—Y.-H. WAN, Theory and applications of Hopf bifurcation. — T. HIDA, Brownian Motion. — J. KEVORKIAN—J. D. COLE, Perturbation methods in applied mathematics. — OLDRICH KOWALSKI, Generalized Symmetric Spaces. — Measure Theory. — RICHARD M. MEYER, Essential Mathematics for Applied Fields. — Physics in one dimension. — J. H. POLLARD, A Handbook of Numerical and Statistical Techniques with Examples Mainly from the Life Sciences. — Probability in Banach Spaces III. — ROBERT D. RICHTMYER, Principles of advanced mathematical physics, Vol. II. — CHARLES E. RICKART, Natural Function Algebras. — Séminaire de Probabilités XIV, 1978/79. — Solitons. — Superspace and supergravity. — MICHIO SUZUKI, Group Theory I. — W. TÖRNIG, Numerische Mathematik für Ingenieure und Physiker, Band 2: Eigenwertprobleme und numerische Methoden der Analysis. — G. WHYBURN—E. DUDA, Dynamic topology ..... 371—386

Livres reçus par la rédaction ..... 180—183, 386—390

INDEX

M. B. Szendrei, Strong subband-parcelling extensions of orthodox semigroups 185
M. Demlová, P. Goralčík and *V. Koubek*, Inner-injective transextensions of semigroups 215
F. Pastijn and *A. Romanowska*, Idempotent distributive semirings. I 239
J. T. Baldwin and *J. Berman*, Definable principal congruence relations: Kith and kin 255
